

BIOLUZ

ALFALFA DEHYDRATED IN PELLETS

**Certified organic alfalfa
with 17% protein on dry matter**

Désialis

Organic certified animal production is becoming increasingly important, partly through consumer demand, and partly through the desire of farmers to commit to organic farming.

As a major player in animal nutrition, **Désialis** has developed a specific range from organic agriculture to meet the precise specifications of certified organic animal production.

GUARANTEES A RESOURCE FROM ORGANIC AGRICULTURE

BIOLUZ a quality controlled

Coming from plots cultivated according to the technical specifications of organic agriculture, BIOLUZ dehydrated alfalfa is harvested under different conditions than conventional plots and the production process involves specific preparations (cleaning and rinsing of the circuits).

Each stage in the production of BIOLUZ (harvest - manufacture - storage) is checked and controlled.

HEALTH AND ANIMAL PRODUCTION

Supply of digestible fiber, minerals and the presence of buffer substances

→ Promotes ruminal function

Rich in minerals, trace elements, β carotene and vitamin E, alfalfa has a beneficial effect on the health and fertility of animals.

→ Better valorization of milk and meat products

BIOLUZ apporte des éléments essentiels à la santé du troupeau

SECURE PROTEINS

BIOLUZ brings high quality protein to the ration

A natural source of protein:

→ **Protected protein** intake through dehydration process, available in the intestine

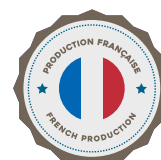

→ Input of French proteins, which is part of the **European protein autonomy**
