

RUMILUZ MASH™

DEHYDRATED LONG CHOPPED ALFALFA
IN BALES

SPECIAL HORSE

The authentic long-strand bale
for horses

Désialis

Désialis has developed a wide range of products, specifically designed to meet the specific requirements of animal production sectors.

Made from alfalfa grown and dehydrated in France: RUMILUZ MASH TM gives the assurance of a **product 100% traced and tested for naturally occurring prohibited substances (NOPS)**..

APPORTE DES FIBRES À LA RATION

A horse's ration must contain fibre, generally provided by the hay. In case this is in deficit, a necessary complement can be provided by dehydrated alfalfa, and all the more so as the ration is rich in cereals or products derived from cereals containing starch.

In addition, the presence of fibre in the horse's ration will lead to an increase in consumption time, **modulating the food transit rate and thus contributing to the welfare of the animal** by reducing the frequency of occurrence of behavioural problems.

RUMILUZ MASH TM contribue au bien-être de l'animal

IMPACT ON THE DIGESTIVE HEALTH OF THE HORSE

Physicochemical properties that improve digestibility

The intrinsic properties of alfalfa, such as its **buffering capacity**, have a **positive impact on the digestive health of the horse**.

The high buffering capacity of alfalfa due to its calcium and protein content has a **preventive role against intestinal acidosis** by modifying the balance of microbiota.

NOPS-FREE PRODUCTS

According to the FEI rules, we guarantee through this logo that our products for horse feed are systematically analyzed in accordance with a **discharge control plan** and are therefore **free from the main Naturally Occurring Prohibited Substances (NOPS)**. Then, these products can be **used in the composition of race horses feedingstuffs**.
